DID YOU GET YOUR CHECK?

DID YOU GET YOUR CHECK?

DID YOU GET YOUR CHECK?

A Special Exclusive *Ultimate Financial Plan (UFP)* Syndication Members Bulletin!

The CMI MOD III and MOD III SC software system has indeed proven to be the financial accounting software program of the future. Those of you that have attended the CMI two-day seminar and workshop have viewed the power of this income producing software program.

We are excited by the calls coming into the headquarters from individuals who are experiencing the financial advantage of such an incredible program. *Our Mod III system has the ability to share the company's profit with the existing client base each and every month!*

It's exciting to hear UFP members share with us their surprise as their commission checks exceed what they were expecting. Amazed members constantly inquire on where the additional income came from because they did not have a syndication equal to their earnings. What's even more exciting are those members who expressed that they have yet to enlist anyone but have been getting paid!

And to those individuals we quickly share with them...the income you have been enjoying for the past five to six months will disappear unless you share that success with new prospects to complete your minimum three requirement.

CMI's software program pays profit-sharing earnings to existing UFP members that have a purchase order in the system from which to apply profit-sharing. Since the beginning of the CMI opportunity, this has been an outstanding benefit of membership in the national UFP syndication. More so than in the past, this has been a huge advantage afforded our CMI membership.

Did you get your profit-sharing check last month!?

If you missed your purchase, it's quite possible that was the case. Maintaining your purchase in the UFP not only maintains the many incredible advantages that come with your TASA plan, but it also maintains your position in the syndication for a possible profit-sharing payout check.

Throughout the UFP, the UBP and the Master, CMI profit-sharing checks are paid out over and above the standard commission and bonus pay. The CMI opportunity remains to be an industry leader as our families prosper from technology to assist them in achieving their financial goals.

The key to the long-term success of the CMI plan is directly tied to this concept...as the company grows, it continues to share its profits with its national membership.

Congratulations to those members who have found their incomes exceeding their syndications! And those that have experienced the profit-sharing plan and have yet to enlist new syndication members... it's time to go to work!

As just a reminder, maintain your strong savings plan for the future to maintain your position in the profit-sharing plan.

This bulletin has been offered as a special notice exclusively to the UFP membership. CMI will continue its efforts through all three programs to notify existing members of how to take advantage of exclusive benefits created through the Mod III financial software program.

If you have missed your purchase, there's no better time than now to regain your savings process...while we were are in the Hot networking season!

CMI Field Communications,
It's time to go to work!
